Technical Skills

- **JavaScript, React, Typescript**
- **NodeJs, Express** and **Mongoose**
- **HTML, CSS, SaSS, MUI, tailwind css** and **bootstrap**
- **Shopify/liquid template**
- **Excellent written** and **verbal** English
- Proper grasp of **mathematics** and **computer science**

Experience

- 6 month Internship at Vention, where I worked on a full-stack application under Scrum methodology, following using **MUI** paired with **React** and **typescript** for the front end and **nodejs/express** for a backend, **mongoDB** as a database. Successfully demonstrated proficiency by excelling in a series of challenging assessments, including exams in **Typescript, JavaScript, Node.js, HTML & CSS**, and **React** during my internship.
- Designed and created a functioning online shop for Alcona Solutions, using **React js, tailwind** and **react-spring**. The website features custom hooks for the multistep forms. Another feature are the fully functioning shopping cart and order system that make it easy for users to place their order.
github : [alconasolutions.com](https://github.com/alconasolutions.com)
- Developed a full stack application for a winery/restaurant/hotel called "Windy Hills" using the MERN stack (MongoDb, express, React, nodejs). The website features a home, gallery and about us pages alongside customisable menus, mutable through an authenticated admin page. Clients can send reservations, which can then be accepted/declined by staff members in the admin panel.
