Github Portfolio

Technical Skills

- **NextJS, ReactJS, Typescript, Javascript**
- **NodeJs, Express** and **Mongoose**, paired with **MongoDB**
- **HTML, CSS, SaSS, MUI, tailwind css** and **bootstrap**
- **Shopify/liquid template**
- **Excellent written and verbal English**

Experience

- 6 month Internship at Vention, where I worked on a full-stack application under Scrum methodology, following using **MUI** paired with **React** and **typescript** for the front end and **nodejs/express** for a backend, **mongoDB** as a database. Successfully demonstrated proficiency by excelling in a series of challenging assessments, including exams in **Typescript, JavaScript, Node.js, HTML & CSS**, and **React** during my internship.
- Alongside a designer, developed a website for Melko using **NextJS** and **TailwindCSS**. The site will feature a catalog for online purchases and a recipe page with full **CRUD** capabilities, linked to each type of flour.
- Created a small online store using **NextJS, Javascript, TailwindCSS, NodeJS**. The store features a landing page, catalog, as well as an admin dashboard where the owner can perform **CRUD** operations. Purchases are **automatically sent via email**, with precise information regarding the purchased products.
- Designed and created a fully functioning online shop for Alcona Solutions, using **React JS, TailwindCSS**. The website features custom hooks for the multistep forms. Another feature is the fully functioning shopping cart and order system that makes it easy for users to place their order, and sends the orders via email..
- Created a website for a mechanic, using **NextJS, Typescript** and **tailwind CSS**. The website features multiple **SEO** optimized pages as well as different contact forms, that send emails to the owner of the website..
- Developed a full stack application for a winery called "Windy Hills" using the **MERN** stack (**MongoDb, express, React, nodejs**). The website features a home, gallery and about us pages alongside customisable menus, mutable through an authenticated admin page. Clients can send reservations, which can then be accepted/declined by staff members in the admin panel.

Education

- Studied **IOT** at Plovdiv university
- Studied **Javascript** at Softuni
